

Please come meet **JetHead Development** and **RVU™** at the **2011 International CES**.

We'd love to talk about RVU, embedded software and how we can help you develop products..

We'll be demonstrating some never before seen RVU implementations, including:  
RVU-compatible Android tablet  
RVU-compatible embedded TV.

RVU is a DLNA-based open-standard for video streaming in consumer server/client applications that includes a pixel-accurate server-generated RUI (Remote User Interface) technology.

**Where to find us:**

Partnered with [Entropic Communications](#) Booth #36212, South Hall, Upper Level, LVCC.

**When:**

Thursday	January 6 <sup>th</sup> , 2011:	10:00 - 18:00 pm
Friday	January 7 <sup>th</sup> , 2011:	09:00 - 18:00 pm
Saturday	January 8 <sup>th</sup> , 2011:	09:00 - 18:00 pm
Sunday	January 9 <sup>th</sup> , 2011:	09:00 - 16:00 pm

*Please come by the booth, or, for an appointment with JetHead, please contact:*

David Bye VP Marketing and Business Development
