

JetHead

Development, Inc.

EMBEDDED SOFTWARE

JetHead develops software for embedded consumer electronic systems in C/C++, Java, Python and other languages.

DEVICE DRIVERS

JetHead has experience creating LINUX based device drivers on all the top silicon platforms (Broadcom, INTEL, Marvell, Sigma, ST, Trident/NXP ...) to meet the demanding needs of middleware vendors world-wide.

TEST SYSTEMS

JetHead develops and maintains sophisticated automated test systems to speed development.

TURNKEY SOLUTIONS

JetHead specialize in the creation and productization of embedded systems for the Consumer Electronics industry.
